The Ageing in Society courses explore local and global challenges, and new directions and solutions in the field of ageing.

Why study ageing in society?

The increasing integration of technology into all levels of everyday life is revolutionising areas such as healthcare provision, product design, productivity, workplaces, transport and infrastructure. At the same time, the needs of older people in each of these areas is accelerating as organisations become aware that the composition of their markets is evolving.

Urban design, immigration policy, consumer policy, consumer protection and financial education, are all being affected by the global ageing phenomenon. Notions of retirement are evolving and plans for longer working lives are influencing approaches that organisations and financial advisers are taking with their staff and clients.

This suite of graduate courses has been designed to increase your leadership and career potential to meet the accelerating market demand for a skilled and knowledgeable workforce.

What will I learn?

On completion, you will be able to:

- Describe and appraise systems, structures and policies in Australia and other countries that address ageing

- Articulate the ways in which age, gender, ethnicity and Indigenous status, society, culture, geography, the environment, disability and socio-economic status influence the ageing experience

- Apply comprehensive knowledge of the ageing experience from conceptual and practical dimensions of the course to develop solutions to complex ageing issues

Who are these courses for?

These courses have been designed for those looking to build a career specialising in this fast-growing sector. This program will be particularly relevant if you are a policy and planning professional, entrepreneur, manager, healthcare professional, or someone already working with ageing populations, individuals and workforces.

If you are committed to developing a greater understanding of the complex implications and opportunities of ageing populations, individuals and workforces, then you should apply.
Entry requirements

To apply for the Ageing courses applicants are required to have:
- An undergraduate degree in any discipline, or equivalent; and
- Documented evidence of at least two years of professional work experience.

The Selection Committee may conduct interviews or call for employer references to clarify any of the criteria above. If you are uncertain about your eligibility, please contact us.

Applicants are required to satisfy the University’s English language requirements for postgraduate courses.

Course structure and fees
